

NetWork Radio

Some starting sites to get preliminary information about network radios.

<https://network-radios.com>

Large selection of network radios. Price is on the + side but promise of better service. Good place to look at types and available network radios.

<http://www.pa7lim.nl>

Source of network radio software for most OS (Android, Windows, Linux and iOS) to connect an AMBE 2+ for DMR, D-Star and Fusion. Additional information is also available.

<https://reflectorloversclub.jimdofree.com/>

One of many AMBE Servers that are available. It is small, easy to set up and use.

<http://nwdigitalradio.com/product/thumbdv/>

USB Thumb AMBE dongle which can be connected directly to a computer or OTG port (charging port) on a tablet or cell phone.

You will need a platform (computer, cell phone or network radio), an AMBE IC vocoder to do the voice coding and software to make it all work.
